

Charnaye Grier

Software Developer

(678) 576.0005 · charnayegrier@gmail.com · Atlanta, GA · charnayegrier.com · in/charnayegrier · github.com/charnaye95

I am a creative, design-minded, and user-driven software developer aiming to create meaningful applications that truly reach people and can add to someone's life. My tech stack includes React, JavaScript, HTML, and CSS. As a developer, I enjoy problem-solving, the look and feel of an application, and how it's working. My degree in Communications and time with General Assembly allows me to work efficiently in collaborative settings, and the ability to bring an audience's perspective to coding.

SKILLS

Languages - JavaScript, TypeScript, Python, HTML, CSS | **Databases** - MongoDB, PostgreSQL, SQL, NoSQL

Libraries and Frameworks - React, Django, Node.js, Pipenv, Express.js, EJS, Handlebars, Bootstrap, Tailwind CSS

Other - VS Code, GitHub, Heroku, Netlify, Postman, REST APIs, Zoom, Slack, Asana, Adobe Creative Suite, Microsoft Office

SOFTWARE DEVELOPMENT PROJECTS

TherapyReady | Django, React, Node.js, CSS, Tailwind CSS

07/2022

- Created an application that transparently features clinic and therapist information and health questionnaires as a resource for users to access. Search functionality is included where users can find clinics or therapists by city.
- Used React, CSS, and Tailwind CSS for the front end of the application within the component file structure.
- Made RESTful API Axios calls to a Django, Pipenv backend, handling all create, read, update, and delete (CRUD) operations. Within Django, utilized its admin interface and Django REST Framework.
- Practiced Git control throughout the production of the application with frequent commits and pull requests until deployment, via Netlify.

Align | Mongo, Express, React, Node.js, CSS

06/2022

- Built an application that displays daily/monthly horoscope information, personal to the user, and includes a dating feature that utilizes swipe functionality.
- Collaborated with a team of 2 software engineers to complete the application within a two-week deadline.
- Utilized React and CSS for the front end of the application within the component file structure.
- Made RESTful API fetch calls to an Express, MongoDB, and Node.js backend, handling all create, read, update, and delete (CRUD) operations, and tested all backend routes during development using HTTP Client.
- Used Mongoose to define schemas for MongoDB collections, and made the application accessible to the public via Netlify.
- Employed Git team workflow throughout the application's lifecycle with frequent commits, merges, and pull requests until deployment.

DraftDay | Mongo, Express, Node.js, EJS, CSS

04/2022

- Created an application that showcases a draft prospect database of the NBA and ideally scouts could use it throughout a season to keep track of players they would be interested in.
- Utilized EJS and CSS for the front end of the application within the Model-View-Controller file structure.
- Made RESTful API fetch calls to an Express, MongoDB, and Node.js backend, handling all create, read, update, and delete (CRUD) operations, and tested all backend routes during development using Postman.
- Used Mongoose to define schemas for MongoDB collections, and made it accessible to the public via Heroku.

Movie Madness | HTML, CSS, JavaScript

03/2022

- Built a Trivia game using HTML, CSS, and Vanilla JavaScript. The application rendered in the browser, implemented DOM manipulation, integrated semantic markup, and exhibited minimal, DRY code constructed by functions.
- Conducted research, applied whiteboarding and pseudocoding logic, and wireframed design using Wireframe.cc in the planning stages of creating the application.
- Practiced Git control throughout the production of the application with frequent commits until deployment, via Github Project pages.

PROFESSIONAL EXPERIENCE

Media Billing Coordinator, Publicis Groupe | Atlanta, GA

06/2018 - 04/2022

- Increased business process efficiency by 33% through implementing effective invoicing processes alongside accounting staff for partnering media companies and contracts departments to maximize agile workflow of billing operations.
- Identified and prioritized daily operations for the billing department overseeing 1,500 invoices monthly and \$3M+ per month in payments.
- Investigated 1000+ past due invoices and numerous backlogged accounts to calculate revenues and reduce the number of unpaid and outstanding accounts.

- Trained and collaborated with a team of 3+ to manage billing needs across multiple mediums; realigning duties to work with one another as a fine-tuned team.

Audio/Video Broadcast Assistant, KSU Athletic Association | Kennesaw, GA

11/2020 – Present

- Assemble and prepare video setups, perform duties in the control room, and shoot compelling action on video for live broadcasts, including sold-out KSU football games with an 8K+ viewership on ESPN3.
- Partner with multimedia staff to establish and model best practices for delivering finalized content and organizing broadcast asset environments.
- Collaborate with station personnel to enhance audio and video levels during programs; recognized by the A/V Producer, A/V Director, and campus life leaders due to the remarkable quality and angles of shots used during on-campus sports events.

EDUCATION

GENERAL ASSEMBLY | REMOTE

01/2022 - 07/2022

Certificate of Completion, Software Engineering Immersive

Full-stack software engineering immersive student in an intensive, 24-week, 400+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies. Developed a portfolio of individual and group projects.

KENNESAW STATE UNIVERSITY | KENNESAW, GA

Graduated 2017

Bachelor of Science in Communication, Film Studies Minor
